

Built for Family – Built for Life

We know life can be busy, so we are here to take away any stresses from running your family mobile phone account. With Active Digital, we ensure you have the right devices for everyone in your family and their needs. With a dedicated award-winning team, we give you a personalised level of support throughout the lifecycle of your contract. Help and support is just a phone call away.

Included in this package, you can bring across any existing mobile numbers you may already have, or if you are already on the O2 network and want to keep your number, that is possible too.

Our family iPhone package gives you more for less, with no upfront costs for devices and plenty of UK 4G and 5G data every month.

Unmissable Mobile Deals for Sanofi Friends and Family

This package is for family of 4 (two adults and two children). However, this package can be scaled up or down depending on the number of people in your home.
